**Art Institute of California, O.C.: Jul 07- April 09**

**Santiago Canyon College: Current**

Hi, my name is Chad.

I have extensive experience working with Photoshop (10 years), Illustrator (6 years), and InDesign (6 years). My specialties include photo editing/manipulation anywhere from color enhancement/correction, background and foreground extractions, photomerges/stitching, blemish removal, stray hair removal, makeup touch up, add or remove elements, image restorations, HDR, basically any need you may have working in landscapes, portraits, sports, or products. I also have experience creating brochures, pamphlets, maps, and flyers, along with web design.

I have been working freelance for about 6 years and have been the photography/social networking manager for some of the sports teams in my area. Along side of freelancing I have had a successful career in coaching high school and college athletes for the past 8 years and have been a part of numerous championships, however I have taken a step back from coaching to focus on my design work full time.

I have found great use in my high attention to minute details in both coaching and editing. I look forward to collaborating with you on any design needs you have!

Thank you for taking the time to look over my resume!
